THInc. Patrol™

Managed Detection & Response to Secure Against THREATS

TECH HEADS

KEY INSIGHT:

SMBs are now big targets for hackers, banking on typically sub-par defenses. If you don't have 24x7 eyes on your environment, YOU'RE VULNERABLE.

WE FEEL YOUR PAIN:

You don't have the time or resources to build a Security Operations Center. And even if you did, it would generate more alerts than your team could keep up with. As a result, you have no one standing guard.

YOU NEED AN INTELLIGENT, RESPONSIVE MONITORING SOLUTION.

That's why Tech Heads offers a complete managed 24x7, US-based Security Operations Center, to provide Managed Detection and Response (SOC-as-a-Service).
WHAT'S INCLUDED:

Network Inspection

Threat Detection + Hunting

Cloud Security Integration

Endpoint Monitoring

Dedicated Security Operations Team

We go beyond alerting, to include incident response, followed by proposed remediation.

IGNORANCE IS ONLY BLISS UNTIL YOU'RE BREACHED.

ADVANCED TOOLS leverage artificial intelligence and machine learning to analyze log data and escalate alerts to a certified SOC analyst for review & response.

HUMAN INTELLIGENCE is used to sort false alerts from those requiring action – creating a powerful hybrid approach to threat detection.

24/7 SECURITY RESPONSE is included to identify threats and escalate to a dedicated security operations team as needed.

THInc. Patrol addresses CIS Controls 2, 7, 8, 13 and 17, systematically strengthening your security posture.

KEY BENEFITS:

Named security experts assigned to your account who augment your in-house IT team

Security monitoring and compliance controls developed to meet compliance regulations.

Customized rules and response actions that exceed the typical MDR solution.

IT'S TIME TO BE ON PATROL.

Schedule a 30-minute meeting to gather system information to prepare a custom proposal.
